

Basic Information

This assignment is due on Gradescope by **1:30 PM on Thursday, October 8.**

Make sure you understand MHC [honor code](#) and have carefully read and understood the additional information on the [class syllabus](#). I am happy to discuss any questions or concerns you have!

A component of this class is helping you understand *why* the math you use works the way it does. To that end, make sure you show all your work as you will be graded on the *process* you use, not just your final answer. And if a question asks you to explain *why* something is true, be sure to answer that part of the question in complete sentences.

Homework will be graded for correctness, and I will point out where mistakes or errors are made. Each homework will be graded *Excellent*, *Satisfactory*, or *Unsatisfactory*. The [course rubric](#) explains more about the distinctions of these categories.

Turn-In Problems

1.2: 20, 24

2.1: 36, 42, 46

2.2: 34, 40, 42, 44

2.3: 2, 6

2.5: 12, 22

(Make sure to turn in #14 below too!)

#14: For each equation below, determine if the function is Odd, Even, or Neither.

Make sure to show your work.

(a) $x^2 - 3x + 1$

(b) $x^4 + 2x^2 + 1$

(c) $x^3 - x$

Additional Problems (to do on your own, not to turn in)

1.2: 19, 23

2.1: 35, 39, 41, 45

2.2: 33, 41, 43

2.3: 1, 5

2.5: 11, 21
