MAT 100 Precalculus
Homework 18

Basic Information

This assignment is due on Gradescope by **1:30 PM on Monday, November 16**.

Make sure you understand MHC honor code and have carefully read and understood the additional information on the class syllabus. I am happy to discuss any questions or concerns you have!

A component of this class is helping you understand *why* the math you use works the way it does. To that end, make sure you show all your work as you will be graded on the *process* you use, not just your final answer. And if a question asks you to explain *why* something is true, be sure to answer that part of the question in complete sentences.

Homework will be graded for correctness, and I will point out where mistakes or errors are made. Each homework will be graded *Excellent*, *Satisfactory*, or *Unsatisfactory*. The course rubric explains more about the distinctions of these categories.

Turn-In Problems

4.3: 18, 20, 32 (don't use your calculator on 32), 42, 46
4.4: 2, 6, 12 , 28
4.6: 12 Hint: Since it "doubles in size every half hour" that means after 30 minutes there will be how many bacteria?

#11. Without using Desmos or any other drawing aid, draw a graph that has a horizontal asymptote at $y = 3$ and a vertical asymptote at $x = -1$.
.

Additional Problems (to do on your own, not to turn in)

4.3: 17, 19, 31 (don't use the calculator on 31), 41, 45
4.4: 1, 5, 11, 27
4.6: 11 Hint: Since it "doubles in size every half hour" that means after 30 minutes there will be how many bacteria?
